9	40	11	26.7	10.5
10	41	12	27.6	10.9

## Measuring Your Feet

If you don't know your foot size it is simple enough to measure them at home.

- Stand on a piece of paper and trace around the outline of your feet
- Use a ruler or tape measure to measure the length of your foot from your longest toe to the back of your heel
- Use that measurement against our size chart to determine your shoe size

Measuring your feet at home is easy but make sure you take these tips into consideration:

- Flatten your foot by shifting your weight forward
- Measure both of your feet and if different, take your size from the larger measurement
- Remember when purchasing shoes to take the width of your feet into consideration
- Use the closest measurement in inches that is equal to or greater than the length of your feet
